Generational Comparison:
Older Workers Age 45+

- Employment
- Education

Employment Trends

Employment percentage change of total workforce and workers over age 45
 Southwestern Ontario, 1996 to 2006

Employment amongst older workers in Southwestern Ontario has grown at a pace over double that of workers of all ages. The increasing labour force participation rate among older workers will likely soften the eventual economic impact of the aging baby-boom cohort.
 Source: Perspectives on Labour and Income, Statistics Canada - August 2007.

Aging Workforces

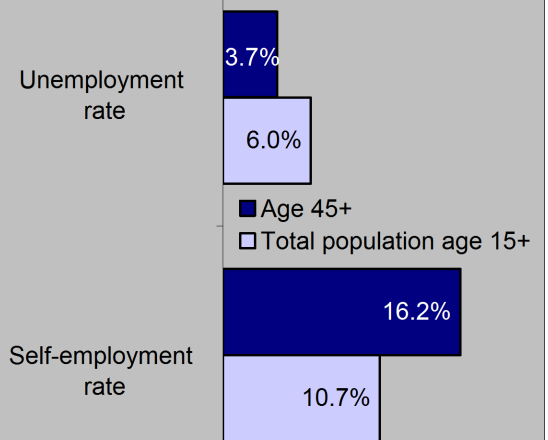

Regions by share of workforce over age 45

- 37 to 39 %
- 40 to 42 %
- 43 to 45 %
- 46 to 48 %

Lambton has an older workforce than the provincial average, with 45% of the local workforce over age 45. There are now nearly 28,000 workers in Lambton over age 45.

Employment Trends

By age group, Southwestern Ontario, 2006

Labour force participation among older workers continues to rise. Higher education levels in this group have brought higher-quality job opportunities and earnings. There is also a greater desire among baby boomers to continue working, either from interest, financial concern, or other factors, such as the virtual elimination of mandatory retirement at age 65. However, older workers experience job separation as often as younger workers, yet have a much lower re-employment rate. Older workers who remain in or return to the labour market may experience age discrimination, either by finding their job opportunities reduced, or having to accept lower-quality or lower-waged jobs.

Fields of Study

Post-secondary fields by age group, employed workforce
Lambton, 2006

Educational Attainment by Age Group

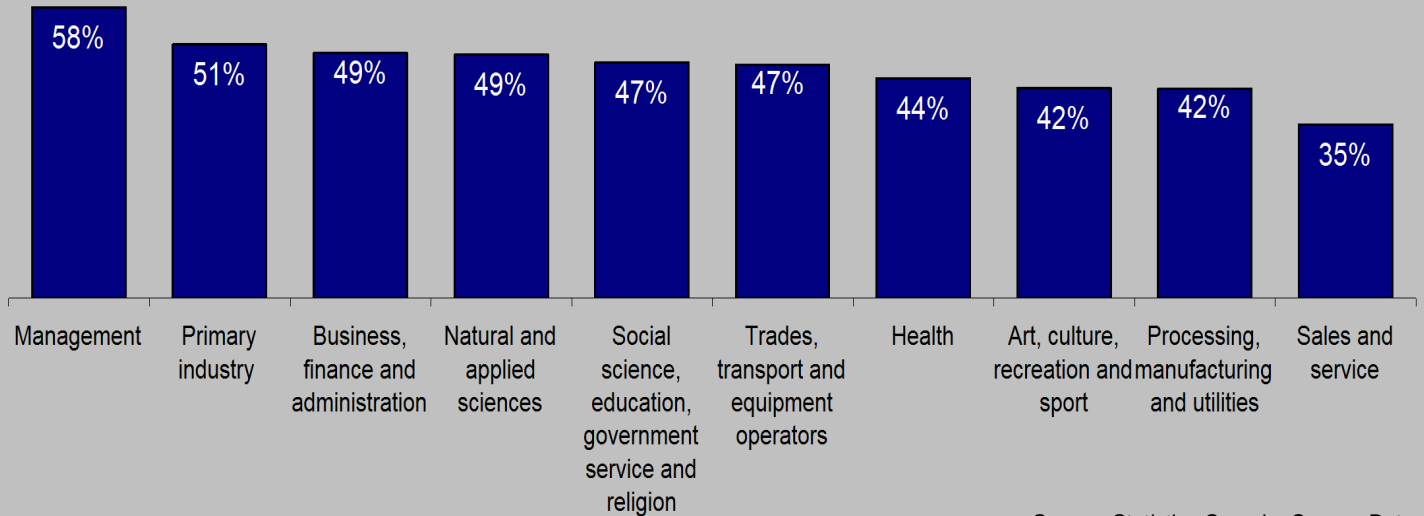

Employed workforce, Lambton, 2006

A greater share of older workers studied architecture, engineering, and related technologies than younger generations. Schooling in personal, protective and transportation services is less common for older workers. Though education levels have increased significantly for older workers, a greater share of younger workers have post secondary schooling.

Aging Occupations

Occupations by share of workforce over age 45, Lambton, 2006

Aside from management occupations, primary industry occupations have the oldest workforces in Lambton county.
